vMix Live Production Software Features

13 Transition Effects

Cut, Fade, Zoom, Wipe, Slide, Fly, CrossZoom, FlyRotate, Cube, CubeZoom, Vertical Wipe, Vertical Slide and Merge transitions available with 4 customisable transition buttons for easy access to your favourite effects.

Professional HD production on a modest PC

vMix is the most efficient live production software on the market thanks to full 3D acceleration.

Create productions with multiple HD sources without breaking the bank or your CPU.

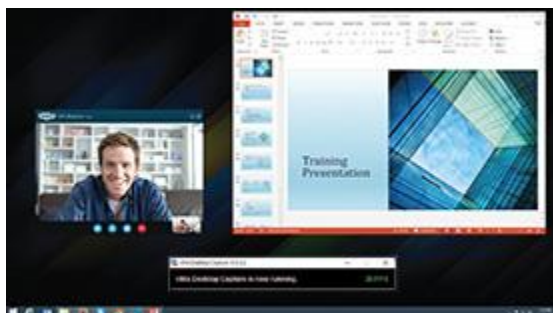

HD Virtual Sets with high quality real-time Chroma Key

4 Built In Virtual Sets - Or build your own

Full Motion Zoom - Customisable camera position presets

High Quality Chroma Key - Use with or without virtual sets to suit your production needs

PC and Mac Desktop Sources

Utilise screen capture from remote desktops running on your network. Great for PowerPoint and Skype.

Audio Capture support for Skype and other videoconferencing software is available under Windows 7

vMix Live Production Software Features

Built-In Title Templates

Easily add and edit a Title or ScoreBoard from the many built in templates or build your own using any Graphics or Vector editing software.

Adjust Text, Font Size and Colour and Real-Time with instant updates.

Video Delay / Instant Replay

Create a Video Delay input and assign it to any available Camera or Output

Save multiple Video Clips of notable events for playback at a later time

Configurable slow motion playback from 5 to 400%

Built-In Audio Mixer

Audio Mixer allows you to easily keep track of all audio sources and includes the ability to Mute, Follow (Auto Mixing) and Delay any source.

A VU Meter is also included with a peaking display to ensure each inputs level is broadcast ready.

Live Video Effects

Colour Correct, Deinterlace, Sharpen, Zoom, Rotate, Pan and Crop any input in real time.

All effects are processed in 4:4:4 32bit colour space for optimal video quality.

vMix Live Production Software Features

Multi View

Combine multiple inputs together using the different "Multi View" presets or customise the position of each element with the available Zoom, Pan, Rotate and Crop controls.

4 Overlay Channels

vMix includes 4 Overlay Channels in addition to the Multi View feature. Each overlay channel can have its own transition effect, position and border.

Touch Screen Web Interface

Control vMix remotely using the **vMix Web Controller** on your Surface, iPad, Android or other touch screen device using the built in web interface. Customisable shortcut buttons can also be created to activate common production scenarios.
