With a full HD 1080p image, the Optoma HD37 home cinema projector delivers magnificent quality video with bright, vivid and highly-accurate colors using Brilliant Color technology. With a 2600 lumens bright image and fifth-generation DynamicBlack technology to generate a remarkable 20,000:1 contrast ratio, the HD37 produces visually stunning images with high color accuracy and better tonal range for true-to-life colors. MHL support allows mobile devices and Media Sticks to connect directly to the HD37 for playback of music, pictures and videos. Full 3D 1080p enables 3D high resolution viewing of movie and gaming content via DLP Sync 3D Glasses or RF 3D Glasses.
